Journal of Hydrology, 48 (1980) 395—396
Elsevier Scientific Publishing Company, Amsterdam — Printed in The Netherlands

CONTENTS VOLUME 48, 1980

Research Papers

Stochastic generation of temperature and solar radiation data
A.D. Nicks and J.F. Harp (Chikasha and Norman, Okla., U.S.A.) 1
The estimation and distribution of storm movement and storm structure, using a correlation analysis technique and rain-gauge data
R.J. Marshall (St. Augustine, Trinidad) 19
The effect of snow drifting on gamma snow survey results
H.F. Cork (Regina, Sask., Canada) and H.S. Loijens (Ottawa, Ont., Canada) 41
On the occurrence and importance of Paretian-tailed distributions in hydrology
I.D. Ochoa, M.C. Bryson and Hsieh-Wen Shen (Fort Collins, Colo., U.S.A.) 53
TRRL and unit hydrograph simulations compared with measurements in an urban catchment
D.W. Williams, R.J. Cameron and G.P. Evans (Marlow, Great Britain) 63
Land-use hydrology: Shoalhaven, New South Wales
A.R. Aston and F.X. Dunin (Canberra, A.C.T., Australia) 71
Comparative estimates of interception loss from three coniferous forests in Great Britain
J.H.C. Gash, I.R. Wright and C.R. Lloyd (Wallingford, Great Britain) 89
The effect of afforestation with *Eucalyptus grandis* Hill ex Maiden and *Pinus patula* Schlecht. et Cham. on streamflow from experimental catchments at Mokobulaan, Transvaal
W.S. van Lill, F.J. Kruger and D.B. van Wyk (Stellenbosch, South Africa) 107
Movement of water and nitrate in the unsaturated zone of Upper Chalk near Winchester, Hants., England
S.R. Wellings and J.P. Bell (Wallingford, Great Britain) 119
Field measurement of seepage and evapotranspiration rate for a soil under plant cover: a comparison of soil water balance and tritium labeling procedure
K. Kreutzer (Munich, Federal Republic of Germany), O. Strebel and M. Renger (Hannover, Federal Republic of Germany) 137
Chemical composition of groundwaters in the vast Kalahari flatland
E. Mazor (Rehovot, Israel), M. Bielsky (Jerusalem, Israel), B.Th. Verhagen, J.P.F. Sellschop (Johannesburg, South Africa), L. Hutton and M.T. Jones (Lobatse, Botswana) 147
Aquifer response to forecasting inputs
K.R. Rushton and L.M. Tomlinson (Birmingham, Great Britain) 167

Short Communication

Differing positions of saline interfaces in aquifers and observation boreholes
K.R. Rushton (Birmingham, Great Britain) 185

Discussion

Differing positions of saline interfaces in aquifers and observation boreholes — Comments
F.A. Kohout (East Falmouth, Mass., U.S.A.) 191

Research Papers

Factors affecting cost optimisation of groundwater development schemes for river regulation
A.B. Birtles and E.H. Morel (Reading, Great Britain) 197
A micro-hydrology computation ordering algorithm
T.E. Croley II (Christchurch, New Zealand) 221
Use of LANDSAT data to improve the water budget computation in Lake Okeechobee, Florida
S.F. Shih (Belle Glade, Fla., U.S.A.) 237

0022-1694/80/0000--0000/$02.50 ©1980 Elsevier Scientific Publishing Company

An approximate solution to the advection–diffusion equation as applied to an estuary
S.T. Wang, A.F. McMillan and B.H. Chen (Halifax, N.S., Canada) 251
A perturbation solution of the nonlinear Boussinesq equation: the case of constant injection into a radial aquifer
D.K. Babu (Princeton, N.J., U.S.A.) and M.Th. Van Genuchten (Riverside, Calif., U.S.A.) . . . 269
^{14}C ages of confined groundwater from the Gwandu aquifer, Sokoto Basin, northern Nigeria
M.A. Geyh (Hannover, Federal Republic of Germany) and K. Wirth (Göttingen, Federal Republic of Germany) 281
Evaporation from a sphagnum moss surface
D.S. Nichols (Grand Rapids, Minn., U.S.A.) and J.M. Brown (Harpers Ferry, W.Va., U.S.A.) . 289
On subsurface drainage of transient recharge
R.N. Singh and S.N. Rai (Hyderabad, India) 303
Relations théoriques entre differents modèles d'écoulement et de ruissellement utilisés en hydrologie urbaine (Theoretical links between different flood routing and runoff models used in urban hydrology)
S. Thibault, B. Chocat et H. Botta (Villeurbanne, France) 313
Muskingum method revisited
W. Strupczewski and Z. Kundzewicz (Warsaw, Poland) 327
Some notes on Muskingum method of flood routing
V.P. Singh and R.C. McCann (Mississippi State, Miss., U.S.A.) 343

Discussions

Translatory characteristics of the Muskingum method of flood routing – A comment
W. Strupczewski and Z. Kundzewicz (Warsaw, Poland) 363
Translatory characteristics of the Muskingum method of flood routing – Reply
M.A. Gill (Zaria, Nigeria) 369
Analysis of hydrological recession curves – A comment
J. Martinec (Davos, Switzerland) 373

Book Reviews

Groundwater Hydraulics by V. Hálek and J. Švec – R.G. Kazmann 375
Hydrodynamics of Lakes – Proceedings of a Symposium by W.H. Graf and C.H. Mortimer – D.N. Foster 376
Contemporary Hydrogeology by W. Back and D.A. Stephenson (Editors) – S.P. Neuman 377
Water – A Comprehensive Treatise, Vol. 6. Recent Advances by F. Franks (Editor) – H.C. Andersen 378
L'eau propre, faire connaissance avec par G. Castany – L. Calembert 379
